

Astrology, Astronomy & Alchemy Under the Stars

Join Astrologer Rebecca Gordon
Berkshire Mountains Retreat, June 22-24

www.MyPathAstrology.com

Join renowned Astrologer, Rebecca Gordon with star expert colleagues in the heart of the Berkshire Mountains for a spectacular weekend immersion under the stars.

Learn how to navigate the fixed stars and constellations of the night sky: Their myth, magic and meaning in the horoscope - and the messages they deliver to us in today's world. Each attendant will create their own unique fixed star chart.

A select group of professional astronomers and scholars will share a rare virtual presentation on the Interpretation of the heavens throughout history as well as Modern Science & Planetary Physics. At night, you will view the sky through top notch telescopes with the guidance our experts. Mars, Saturn, Uranus, Neptune, and some of our our largest star clusters - 11,000 light years away will be in full view.

We will explore the ancients' use of alchemy and astrology and discover how these ideas apply to today's world. Each attendant will work with and create their own alchemical chart healing tools. We will also explore the use of astrological sound therapy.
