

Chiron Through the Signs 1940-present

This list gives approximate dates of Chiron through the signs. Because there are phases when Chiron behaves like an inner planet (close to the Sun), there are periods when it changes signs several times in one year. For a more detailed listing by month, [check this table](#). However, if you're born anywhere near a transition, it will be a good idea to look up your birth chart at astro.com and get an exact location. The birth time is not necessary for sign lookup but it is necessary for house lookup, since the house will change 12 times a day.
